Special Issue

Fruit and Vegetable Quality and Bioactive Compounds at Harvest and during Postharvest Storage

Message from the Guest Editor

To reduce food quality losses and maintain the health-related compound content, research is required to improve quality and functional parameters at harvest and during postharvest. Please share your success stories from research in fruit or vegetable quality and antioxidants around the world in this Special Issue. Submissions on (but not limited to) the following topics are invited: (1) pre- and postharvest factors related to fruit quality and bioactive compound content; (2) ecofriendly technologies or treatments, such as elicitors, to improve fruit quality and antioxidant content; (3) optimum strategies or tools to minimize postharvest fruit quality and functional losses.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
