

## Special Issue

# Circular Economy in Agriculture through Waste Valorization and Recycling

### Message from the Guest Editors

The aim of this Special Issue is to address the reduction in waste generation, promote resource efficiency, increase the sustainability and resilience of agricultural and agri-food systems, and contribute to the development of a circular bioeconomy. In particular, this Special Issue welcomes contributions that address various aspects related to the conversion of linear agricultural and agri-food systems into circular ones. This includes, but is not limited to, studies on waste valorization technologies, innovative biorefinery processes, waste-to-energy conversion methods, resource recovery and upcycling strategies, and circular economy business models in the agricultural and agri-food sectors.

We are seeking contributions that demonstrate work towards creating a more sustainable, efficient, and resilient agri-food sector that maximizes the value of resources, minimizes waste generation, and contributes to a more circular economy. Join us in this mission to transform our linear agricultural and agri-food systems into circular ones for a more sustainable future.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
