

## Special Issue

# Genome Sequencing and Analysis in Crops

### Message from the Guest Editor

The past two decades has seen the initial implementation and development of plant genome sequencing followed by sequential deciphering of numerous crop genomes. Intrinsic obstacles have asked for the development of technologies, strategies and approaches different from recipes used in genome sequencing in other kingdoms of life. The special issues aim to reflect on the current status of crop genome sequencing and the new avenues that are now open to be explored by putting the reference genomes to work. Ms. to be considered are interlinked with genomes and new directions and challenges in crop genomics - reaching far beyond application of sequencing technology only-:

- genomes and genome sequencing technology; polyploid crop genomics; phenomes; crop transcriptomes; crop proteomes; the transition to breeding (pan-genomes and -regulomes)
- germplasm dynamics; drift and fixation; domestication genomics; quantitative genetics & genomics;
- heterosis and how (pan)genome insights help to understand and utilize the phenomenon in advance plant breeding

---

### Guest Editor

Prof. Dr. Klaus F. X. Mayer

Plant Genome and Systems Biology, Helmholtz Center Munich, German Research Center for Environmental Health, Munich-Neuherberg 85764, Germany; Plant Genome Biology, Technical University of Munich (TUM), 80333 München, Germany

---

### Deadline for manuscript submissions

closed (1 July 2020)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

---

### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,  
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
