

Special Issue

Enabling Urban Agriculture: Exploring the Mainstreaming of Global Urban Food Initiatives

Message from the Guest Editors

This Special Issue (SI) calls for more critical perspectives on radical UA in cities, through reflecting on innovative models, growth strategies, and other elements. We are also interested in papers that provide a critical lens on the practice, enabling other sites to reflect on barriers and learn lessons from pioneering projects. This interdisciplinary SI is relevant for agronomists and also social scientists, environmental scientists, planners, geographers, and other disciplinary areas. We hope to bring together an SI which provides a holistic critical exploration of UA and its potential to upscale and be mainstreamed.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston
