

Special Issue

Increasing Temporal Diversity: Potential of Grassland Leys in Crop Rotations for Sustainable Agriculture

Message from the Guest Editors

We invite you to submit papers on (but not limited to) the following topics: (1) Nitrogen transfers from grassland leys containing legumes to a follow on crop, (2) effect of grassland termination (timing of ploughing, conservation tillage vs ploughing etc) on the conservation of soil carbon and nitrogen stocks, (3) plant–soil interactions in grassland leys (e.g., improved rooting depths from macropores of grassland ley, change in microbial communities, etc.) and their impact on the agronomic potential of follow-on crops and the soil organic carbon stocks, (4) benefits from improved biodiversity, both intrinsic (e.g., higher micro-/macrofauna diversity due to habitat diversity/quality), and agronomic/environmental (e.g., weed suppression and weed seed predation, pollination services, pest control), and (5) modelling of diversity effects, whole-system analyses of crop rotations in mixed farming system approaches compared to monocropping and/or permanent grasslands and decision-supporting tools.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
