

Special Issue

Grazing Effects on the Nutritive Value in Grassland Ecosystems

Message from the Guest Editor

This Special Issue will invite scientists to share work on their improvements in grassland nutritive value across grassland ecosystems. Submissions on the following topics (papers are not limited to these topics) are invited: (1) Innovative methods to increase grassland nutritive value in grazing systems; (2) Role of legumes to increase grazing efficiency; (3) Addition of other species to increase sward nutritive value; (4) Applying new methodologies to overcome nutritive value deficiencies in grazing systems; (5) Impacts of increased nutritive value on animal grass dry matter intake and (6) Modeling and decision support systems.

Guest Editor

Dr. Michael O'Donovan

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
