

## Special Issue

# Novel Studies in High-Performance and Precision Plant Protection Products Application

### Message from the Guest Editor

With widespread Plant Protection Product (PPP) use, food quality and the life expectancy of humans have vastly improved, considerable attention has been given to environmental protection. Both manual and high-efficiency sprayers, such as the knapsack sprayer, spray gun, boom sprayer, air-blast sprayer, manned fixed-wing aircraft and so on, have been applied worldwide in different scenarios. Since the beginning of this decade, agricultural unmanned aerial spraying systems (UASS) for plant protection are growing rapidly as a new tool for PPP application. Both aerial and ground plant protection machines are moving in the direction of unmanned, precision, high-performance, standardization and informatization. More and more precise application technologies were proposed and applied with less PPP lost in the environment, but more research is needed so that new technologies can be incorporated to minimise agrochemical use and improve the timing of applications.

In this Special Issue, we aim to focus on any novel studies in theory, system, equipment, technology and evaluation methods for high-performance and precision PPP utilization. Both research and review articles are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
