

Special Issue

Fruit Quality Improvement and Postharvest Biotechnology

Message from the Guest Editors

Over the years, the fruit quality research has focused on understanding the physiological, biochemical, and molecular mechanisms that regulate fruit quality traits. Advances in postharvest biotechnology have provided new opportunities for improving fruit quality and extending shelf life. This Special Issue aims to explore the genetic, molecular, and biochemical factors influencing fruit quality development and postharvest maintenance. Additionally, it seeks to promote the application of advanced preservation techniques and biocontrol strategies to reduce postharvest losses and improve fruit supply chain management. Recent cutting-edge research has leveraged omics, gene editing, and molecular breeding technologies-based approaches to uncover key regulatory networks in fruit quality formation. While novel postharvest treatments, smart packaging, storage innovations, and biocontrol strategies targeting postharvest diseases are being developed to maintain fruit freshness. We welcome original research, reviews, and case studies focusing on fruit quality improvement and postharvest biotechnology.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
