

Special Issue

Infectious Plant Diseases: Emerging Threats and Advances in Plant Protection

Message from the Guest Editors

Infectious plant diseases have historically caused severe agricultural losses and food insecurity. Significant events such as the Irish Potato Famine illustrate the devastating impact of plant pathogens on human societies. Advances in molecular biology, genomics, and plant pathology have improved our understanding and management of these diseases. However, new pathogens continue to emerge and existing ones evolve, exacerbated by climate change and global trade, thus presenting ongoing challenges to global food security and ecosystem health. This Special Issue explores the latest research and innovations in combating plant diseases. We seek to cover a broad range of topics, including the identification of novel pathogens, advancements in diagnostic technologies, genetic and biotechnological approaches to enhancing disease resistance, and the influence of environmental changes on disease dynamics. By compiling cutting-edge research and expert insights, we aim to provide a comprehensive overview of the current challenges and future directions in plant protection.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
