

Special Issue

Herbaceous Field Crops Cultivation

Message from the Guest Editors

Dear colleagues, Herbaceous plants comprise some of the most important crops such as cereals, leguminous, aromatic, oil, etc. They are worldwide diffused for different aims ranging from agricultural and food applications to industry, energetic, pharmacology and medicine sectors. In the last decades, many advances have been made in the cultivation of herbaceous crops, mainly with the aim of yield increasing. Nevertheless, several aspects related to the effects of agronomic practices on quality characteristics require further efforts, as well as their cultivation in organic farming. The present Special Issue will be focused on the recent advancements in the wide field of herbaceous field crops cultivation. Research papers, communications and review articles are welcome. In particular, we encourage contributions covering the management of agricultural practices in herbaceous field crops, including fertilisation, irrigation and weed control. Particular attention will be given also to the application of these agronomic practices in organic farming and their effects on food quality.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
