Special Issue

Hormone Signaling and Regulation in Cultivated Plants

Message from the Guest Editor

Plant hormones are naturally occurring molecules responsible for many aspects of plant growth and development, and play critical roles in response to biotic and abiotic stressors, such as pests, diseases, drought, salinity, nutrient imbalances, and extreme temperatures. Although hormones are naturally occurring in plants, some specific hormones can be also synthetically produced for exogenous application to crops. The ways in which crop plants generate, transport, and regulate both the local and long-distance hormone-based chemical signals that influence plant growth and production are important research targets. This Special Issue is intended to present novel research on the role of plant hormones in crop physiology, and yield and stress responses. In particular, submissions will be invited on the following topics (other related topics can be also accepted): (1) hormone signaling in crop plants, (2) hormone regulation of crop plant growth and production, (3) influence of plant hormones on crop plant tolerance to biotic and abiotic stresses, and (4) exogenous hormone applications and hormone-based biostimulants to improve crop plant physiology and vield.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
