

Special Issue

Optimal Allocation and Regulation of Agricultural Water Resources and Soils

Message from the Guest Editors

At present, the global shortage of water resources is becoming more and more serious, especially in arid and semi-arid areas, where agricultural water is scarcer, which will seriously threaten global food security. In recent years, global scientists have carried out a lot of research work in the optimal allocation of various water resources and safe use of agriculture, leading to many significant research achievements. However, in the face of environmental change, to summarize the research progress of water resources in this area, share successful experience and technical achievements, we are pleased to publish a Special Issue on optimal allocation and regulation of agricultural water resources to promote the further development of this research field.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
