

Special Issue

Ecology and Management of Weeds in Different Situations

Message from the Guest Editor

Weeds persist as a significant concern in various ecosystems, agricultural fields, and natural landscapes, impacting biodiversity, productivity, and sustainability. This Special Issue aims to consolidate the current understanding of weed ecology and management across diverse environments. We invite contributions presenting cutting-edge research revealing weed dynamics, biological traits, ecological interactions, and novel management strategies. Original research articles, comprehensive reviews, perspective pieces, and case studies exploring innovative techniques or offering new insights into weed control, adaptive management, and ecological restoration in varied contexts are solicited. This Special Issue aspires to foster interdisciplinary dialogue and offer a comprehensive resource for researchers, practitioners, and policymakers engaged in combating weed-related challenges across diverse landscapes. Join us in advancing knowledge and devising sustainable weed management practices for different situations.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief
