

Special Issue

Legumes Pathology: Rationale, State of the Art and Evolution

Message from the Guest Editor

The field of legume plant pathology is expanding, and thus, requires a multi-interdisciplinary approach to capture the complexity of interactions for any given disease, disease complex or syndrome. In this Special Issue, we emphasize: the multidisciplinary relationships between legume pathology and other disciplines; disease management, comprising precision agriculture, plant growth and development, decision analysis and disease risk forecasting; the development and use of new and novel plant protection chemicals; food safety and security; phytosanitary regulation; new ways of exploiting host genetic diversity, including host plant resistance and genomics and proteomics; legume breeding for disease management; new perspectives on biological control and legume microbial interactions; advances in surveillance and detection tools; the invasion of unusual and re-emerging pathogens; and the consequences of climate change on legume crops and pathogens.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
