

Special Issue

Research Progress in Seed Dormancy and Pre-harvest Sprouting

Message from the Guest Editors

Dormancy is a mechanism that has evolved to prevent seeds from germinating under environmental conditions that are adverse for the establishment and survival of seedlings; it inhibits pre-harvest sprouting or vivipary. Prolonged dormancy, however, can lead to non-uniform germination in the field. Studies on seed dormancy and seed sprouting prior to crop harvest can provide significant information related to scientific theories in the fields of forestry, agriculture, and food science. This Special Issue aims to give an overview of the most recent advances in the field of the stimulation of dormancy release and/or prevention of pre-harvest sprouting. It is aimed at providing information on the advances in the seed germination of various plant taxon in relation to scientific theories, agriculture, forestry, and food science. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Aerial/soil seed banks;
- Germination ecology;
- Germination molecular biology;
- Pre-harvest sprouting;
- Seed heteromorphism;
- Seed dormancy;
- Seed priming;
- Seed development.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
