

Special Issue

Innovations in Green and Efficient Cotton Cultivation

Message from the Guest Editors

Cotton production has been a crucial part of global agriculture for centuries, but traditional methods often lead to significant environmental challenges. In light of increasing demands for sustainability, innovative cultivation techniques are essential to enhancing productivity while minimizing resource use and ecological impact. This Special Issue aims to showcase the latest research on green and efficient cotton farming, with a focus on strategies that promote high yields, resource efficiency, and environmental conservation. Topics include water-efficient irrigation, optimized fertilizer use, pest and disease control, integrated crop management, and innovations in precision agriculture. Additionally, studies on intercropping systems involving cotton and other crops are welcomed, as they play a vital role in enhancing productivity and sustainability. We invite original research, reviews, and case studies that address sustainable cotton cultivation practices, environmental impacts, and strategies for improving production efficiency worldwide.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
