

Special Issue

Management of Soil Organic Carbon for Soil Health in Agroecosystems

Message from the Guest Editor

Soil organic carbon (SOC) is a key component of soil health in agroecosystems. Improving SOC reserves increases soil fertility and ensure food security. Moreover, it has been widely accepted that SOC may have great potential for climate change mitigation, as well as the soil carbon storage and actions to promote it. The SOC management implies relevant strategies that are necessary to achieve a positive C balance. Therefore, it is only through sustainable agricultural practices and their effects on SOC that soil health is safeguarded. I cordially invite authors to contribute to this Special Issue with novel research and reviews that will give the readers of *Agronomy* updated and new perspectives about the influence of agronomical practices and approaches (conventional, organic, agro-ecological, or precision agriculture) on soil health, and effects on soil properties, plant nutrition, rhizosphere biodiversity, food security and changing climate change scenarios.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
