

Special Issue

Development of Transgenic Plants

Message from the Guest Editors

Traditionally, plant breeders have performed classical breeding practices for introducing desirable traits in crops. However, traditional techniques were significantly flawed. Recent advancements in the field of plant biotechnology have enabled humans to propagate plants with beneficial characters. Now, inserting the 'gene of interest' from an entirely different species or even kingdom into the target crop plant is possible, resulting in a transgenic plant with ideal traits. Hence, this Special Issue aims to provide advantages and disadvantages, along with the applications of transgenic plant development for the betterment of mankind. This Special Issue focuses on the "Development of Transgenic Plants" and encourages the active participation of experts in the field that addresses issues such as food security, sustainable development, environment, agriculture, and biotechnology. This Special Issue provides information on aspects related to transgenic plants and their development with special attention to crop improvements.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
