

## Special Issue

# Fruit Growing: Production Practices and Post-Harvest Management

### Message from the Guest Editor

Fruits are essential to human nutrition and several studies have been carried out analyzing the quality traits during fruit development, ripening and under post-harvest handling. Additionally, the proper application of pre- or post-harvest treatments can sustain product quality through the supply chain. This Special Issue aims to highlight significant findings in fruit ripening and development by external or internal factors during pre- or post-harvest handling and attempts to elucidate aspects which are linked with fruit quality. We welcome submissions of original research and review articles on the following subthemes but are not limited to:

- Pre-harvest and post-harvest technologies to improve the quality of fruit crops
- Advanced agronomic practices to enhance the quality and shelf-life of fruit crops
- Factors influencing fruit development and quality, such as the growing environment, plant growth regulators, the cultivation regime, and climate change
- Integration of omic tools in identifying individual compounds and metabolic pathways involved in fruit ripening, development, and quality formation

### Guest Editor

Dr. Vasileios Ziogas

Institute of Olive Tree, Subtropical Crops and Viticulture, Hellenic Agricultural Organization – DEMETER, Chania, 73134 Crete, Greece

### Deadline for manuscript submissions

closed (30 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
