Special Issue

Decrypting the Mechanism of Protein Transcription in Plant Stress Resistance

Message from the Guest Editors

This Special Issue welcomes submissions of studies on horticultural plants, including but not restricted to fruit trees, vegetables, flowers, and tea. Articles addressing fundamental questions around responses to stress resistance are welcome. Studies using biochemical, molecular, genetic, genomic, and physiological approaches are within the scope of this issue. Studies using cutting-edge technologies such as genomics, genome editing, and molecular breeding are also welcome. We believe that this Special Issue will be helpful to research on horticultural plants and to the improvement of horticultural plant tolerance to abiotic and biotic stresses in future.

Guest Editors Prof. Dr. Qinglin Liu

Prof. Dr. De-Guo Han

Dr. Xingang Zhou

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
