Special Issue

Development and Application of Sustainable Organic Fertilizer

Message from the Guest Editors

It is our pleasure to announce the launch of a new special Issue dealing with the development of green organic fertilizers. The main goal of this issue is to cover all research focused on the development of different types of fertilizers based on the use of organic materials that can be previously treated in order to increase nutrient availability and the biostimulant action of the organic moiety. It is also very interesting to explore the interactions within the fertilizer matrix of the organic material with specific microorganisms with the ability to both increase fertilizer efficiency and plant growth. In this framework, the ability of these types of fertilizers to improve soil quality and fertility is also covered by the issue. Likewise, the formulations of organic material with other sources of nutrients such as rock phosphate or other minerals are also considered.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
