

Special Issue

Organic Farming: Impacts on Food Quality and Human Health

Message from the Guest Editor

Global demand for organic foods has increased rapidly over the last 20 years, and a main drive has been consumer perceptions that organic production and processing methods improve the nutritional quality of food and human health. Recent systematic reviews and meta-analyses have shown that there are significant differences between organic and conventional foods. However, there is still considerable scientific controversy about whether and to what extent these composition differences result in tangible health benefits. This Joint Special Issue of *Nutrients* and *Agronomy* aims to present current knowledge regarding:

- nutritionally-relevant composition differences between organic and conventional foods
- why organic farming methods affect the nutritional composition of foods
- potential impacts of organic food consumptions on animal and human health, and
- potential trade-offs or synergies between food quality, safety and security impacts of organic food production

The Special Issue will include both reviews and primary research articles that focus on major gaps of knowledge.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
