

Special Issue

Integrating Pest Management into Agricultural Production Systems

Message from the Guest Editor

Light is the primary energy source and the most important regulatory factor in the life cycle of plants. Light drives photosynthesis in plants, helping them to build carbon-based materials, and further acts as an environmental signal. Plants respond to the intensity, wavelength, duration, and direction of light. Light emitting diodes (LEDs), recently applied widely for plant cultures, are environmentally-friendly and long-lasting light sources available in the spectral range covering the entire visible and near-UV regions, and supersede conventional lamps in efficiency. This Special Issue on the “Control of LED Lighting Based on Plant Physiological Principles” will focus on the broad area of plant growth and development including, but not limited to, germination, seedling establishment, photomorphogenesis, and the phase transition and flowering of plants using LED lighting technology.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
