

Special Issue

Pesticide Residues and Nutritional Quality of Agro-Products

Message from the Guest Editors

In crop growth, pests and diseases often occur. The prevention and control of pests and diseases is mostly carried out with chemical pesticides; approximately 3.5 million tonnes of pesticides are utilized annually worldwide, which inevitably leads to pesticide residues in agro-products. With the increasing public concern about food safety, pesticide residues and the nutritional quality and health of agro-products have been paid increasing attention. Therefore, we are pleased to invite you to submit your innovative research to this Special Issue titled “Pesticide Residues and Nutritional Quality of Agro-Products”. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: pesticide residue analysis and risk assessment in agro-products; nutritional quality of agro-products.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
