

Special Issue

Phytochemicals of Edible Plants in Human Health

Message from the Guest Editors

It is a great pleasure for us to act as in this Special Issue covering the topic “Phytochemicals of Edible plants in Human Health”. The present Special Issue will focus on recent advances in the study of secondary metabolites from edible plants possessing activities that can help human health. Research papers, communications, and review articles are all welcome. We encourage papers dealing with the study of the impact of agronomic practices on the accumulation of bioactive compounds in edible plants; manuscripts concerning the change in metabolic content and bioactivity as a function of post-harvest treatments are also very welcome. Special attention will be given to contributions covering the assessment of phytochemicals in rare and/or endemic edible plants from the Mediterranean area. Finally, Editors will focus the attention on original research on the re-evaluation of agro-industrial wastes and food byproducts.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
