Special Issue

Genetic Architecture of Kernel Development in Cereal Crops

Message from the Guest Editors

Cereal crops, including wheat, rice, maize, barley, and sorghum, serve as the cornerstone of global food security, providing over 50% of the world's caloric intake. The development of cereal kernels – encompassing grain size, composition, and nutritional quality – is a complex process governed by intricate genetic and molecular networks. Understanding the genetic architecture of kernel development is pivotal for advancing crop improvement strategies aimed at enhancing yield, and nutritional value under rapidly changing climatic conditions. To address these challenges and opportunities, we are launching a Special Issue in Agronomy titled "Genetic Architecture of Kernel Development in Cereal Crops". This Issue will focus on cutting-edge research that elucidates the genetic, genomic, and molecular mechanisms underlying kernel formation, maturation, and quality traits.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
