Special Issue

Reclaimed Water as a Potential Resource to Sustain Irrigated Agriculture and Reduce the Impact of Climate Change

Message from the Guest Editor

This issue will focus on original research on the reuse of reclaimed municipal, agricultural, and animal-production-system wastewaters for the production of crops that are safe for human and animal consumption. This issue also welcomes work on economic aspects of comparing freshwater with treated wastewater to irrigate crops, landscape, and turfgrass, while saving freshwater resources for human consumption.

Keywords:
- municipal treated wastewater
- agriculture and aquaculture water reuse
- sustainable irrigated agriculture
- wastewater biosolids
- economics of wastewater treatment and agricultural reuse

Guest Editor

Dr. Jorge F.S. Ferreira

Agricultural Water Efficiency and Salinity Research Unit (US Salinity Lab), Riverside, CA, USA

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston
Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
