

## Special Issue

# New Insights into Pathogen, Insect Pest, and Weed Control in Field and Greenhouse Cropping Systems

### Message from the Guest Editor

Improved knowledge of electrostatics has provided an academic basis for the creation of innovative tools to manage all classes of pests (pathogens, insects, and weeds). The present Special Issue highlights various types of electrostatic research on the management of plant pathogens, insect pests, and weeds under field and greenhouse conditions. Of these, quality-improved electrostatic traps constitute a promising tool to prevent pathogenic, wind-carried spores and flying insect pests from entering a greenhouse or to monitor their spatial and periodic changes, to ensure safe crop production. Safe arcing apparatus can be a practical tool to eradicate weeds specifically or insect pests emerging from underground pupae. Despite ongoing challenges, continued research will provide new insights that will enable the development of reliable plant protection methods, to ensure sustainable crop production, even as changes arise in different cropping systems.

### Guest Editor

Prof. Dr. Hideyoshi Toyoda

1. President of Research Association of Electric Field Screen Supporters, Nara 631-8505, Japan
2. Department of Agricultural Science, Kindai University, Nara 631-8505, Japan

### Deadline for manuscript submissions

closed (15 September 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
