

Special Issue

Application of Nanomaterials for Diseases and Pest Control in Agriculture

Message from the Guest Editors

Since nanomaterials have different physical and chemical properties than macroscopic materials, the development of nanomaterials and related technologies represents a new avenue for creating smart nanopesticides. Fertilizers and pesticides are the agrochemicals most commonly used in agricultural production systems; thus, the incursion of nanotechnology in agriculture was applied to these agrochemicals. In particular, pesticides play a crucial role in the defense of plants against pest and disease threats, enhancing crop productivity. In this Special Issue, reviews and original articles are expected to delve deeper into the topic nanopesticides to increase penetration, coverage, and absorption of the active ingredient at the application site, including all nanomaterials with nanotechnological applications in agriculture.

- Nanomaterials with antibacterial, antifungal, or insecticidal activity;
- Controlled-release nanomaterials;
- Nanomaterials to improve the stability of active ingredients;
- Nanomaterials with pheromone application;
- Nanomaterial-mediated nucleic acid pesticides;
- Risks associated with nanomaterials as nanopesticides.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
