

Special Issue

Organic vs. Conventional Cropping Systems—Series II

Message from the Guest Editors

The continuation of the Special Issue will deal with several aspects of herbaceous/tree crop cultivation under “Organic vs. Conventional Cropping Systems” in both the open field and greenhouse. Several agronomy-related topics will be taken into consideration that encompass crop physiology, genomics and breeding, crop modeling under climate change, digital and precision farming applications, product quality, ecological footprint, etc. The main goal of this Special Issue is to report the current state of the art, giving useful information to improve the sustainability of production in the two cropping systems. We invite experts and researchers to contribute with original studies, reviews, and opinion papers covering all topics related to the OCS vs. the CCS. Authors are welcome to submit articles and reviews on the most important aspects of this comparison, such as performances of genotypes or products and agroecological strategies aiming to increase sustainable crop production.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
