

Special Issue

The Revision of Production Potentials and Yield Gaps in Field Crops

Message from the Guest Editors

In the face of rising global food demand and increasingly variable climatic conditions, narrowing the yield gap in field crops has become a key research priority. This Special Issue aims to comprehensively revise the concepts of production potential and yield gaps across diverse cropping systems and agroecological zones. We welcome innovative contributions that explore physiological, genetic, environmental, and management-related factors influencing yield potential, along with spatial and temporal yield variability. Studies that apply advanced modeling tools, remote sensing, AI-driven decision support systems, and big data analytics to quantify and interpret yield gaps are particularly encouraged. Moreover, we seek interdisciplinary research on the role of agronomic practices such as precision agriculture, optimized fertilization and irrigation, sustainable crop rotations, and the use of biostimulants and soil amendments in bridging the gap between actual and potential yields. Contributions that assess the socio-economic and policy dimensions of yield gap reduction are also welcome.

Guest Editors

Dr. Dario Iljkić

Dr. Marta Jańczak-Pieniążek

Prof. Dr. Ionel Samfira

Deadline for manuscript submissions

20 November 2026

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
