

Special Issue

Study on Agronomic Measures and Physiological–Ecological Mechanisms for High-Yielding, High-Quality, and Resource-Efficient Utilization in Wheat Production

Message from the Guest Editors

This Special Issue explores the agronomic measures and physiological–ecological mechanisms contributing to increased yield and improved quality in wheat crops. The scope of the Special Issue will cover various topics, including fertilizer and water management and variations in ecological conditions. Potential areas of interest could include but are not limited to investigating growth development, such as photosynthesis, enzyme activity, matter transportation, hormone content, sugar content, amino acid content, starch content, protein content, etc. These factors are responsible for high-yield and quality traits in wheat. Researchers contributing to this Special Issue are expected to present original research, reviews, and perspectives to enhance understanding of agronomic measures and physiological–ecological mechanisms for improving yield, quality and resource utilization efficiency.

Guest Editors

Dr. Yanjie Wang

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
