

Special Issue

Precision Operation Technology and Intelligent Equipment in Farmland—3rd Edition

Message from the Guest Editors

The use of precision operation and intelligent equipment in fields is at the frontier of modern agricultural technology development. In recent years, experts have conducted much research on the interaction mechanism of crops, soil, and other environmental factors; the rapid acquisition of information; and the employment of precise control models of crop production and intelligent equipment, using modern information and intelligent control technology. These remarkable achievements have played an important role in updating traditional agriculture and developing modern agriculture practices with high yield, quality, efficiency, ecological sustainability, and safety. This Special Issue welcome papers involved in research on precision operation and intelligent equipment in fields. Specific topics include, but are not limited to, the following:

- Agricultural sensing mechanisms and new sensors;
- Machine–soil–crop interaction mechanisms;
- Crop production control models;
- New agricultural machinery and field robots;
- Intelligent control of agricultural machinery;
- Unmanned operations.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
