

Special Issue

Promoting Sustainable Agriculture through the Manipulation of Plant-Associated Microbial Communities

Message from the Guest Editor

The present Special Issue aims to provide an updated collection of research studies and reviews dealing with the most important aspects of applied microbiology and plant production. The Special Issue welcomes studies dealing with, but not limited to, the following subjects:

- Solarization and other physical and chemical methods to modify the composition of soil microbial communities;
- Use of plant-growth-promoting bacteria as soil inoculants;
- Control of plant pathogenic organisms by means of microbial antagonists;
- Use of microbial consortia to enhance plant productivity;
- Non-nutritive effects of compost and vermicompost on plant-associated microbial communities and plant performance;
- Role of the phyllosphere on plant health;
- Manipulation of phyllosphere and rhizosphere microorganisms to enhance plant health;
- Plant and soil microbial communities in organic and conventional plant production systems;
- Contribution of the plant microbiome to the chemical characteristics of the plant host.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
