

Special Issue

Disease Management in Orchards

Message from the Guest Editors

Orchard disease management is an important measure to ensure the health of orchards and improve fruit tree yields, including disease investigation, monitoring techniques, preventive measures, disease prevention and control, and management. This Special Issue in *Agronomy* welcomes research articles and comments, discussing systematic and comprehensive orchard disease prevention and control plans and exploring scientific and efficient disease prevention measures. The following studies are all within the scope of consideration for this Special Issue: establishing disease databases; modern disease detection techniques; excavating high-quality seedlings; rational cultivation management; biological, chemical, and physical control; orchard quality monitoring; etc.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston
