

## Special Issue

# Emerging Research on Adaptive Plants in Karst Ecosystems

### Message from the Guest Editor

Currently, 10 % of the Earth's area can be described as karst landform, and 13% of China's land area is karst. Karst soils, with the characteristics of drought, high pH and high bicarbonate, etc., strongly affect the growth and development of crops. Accordingly, improving crop productivity in karst areas is of vital importance for maintaining ecosystems (carbon neutral), ensuring food supply and promoting sustainable social development. This Special Issue aims to present studies on the following topics: the adaptive mechanisms of karst-adaptable crops (physiological, genetic, ecological and geochemical mechanisms, etc.); screening principles and technologies of karst-adaptable crop varieties; the allocation and regionalization of karst-adaptable crops in karst areas; and interactions between karst-adaptable crops and biotic or abiotic environments. Scientists from all over the world are invited to submit both original research and review articles on these topics.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
