

Special Issue

Innovative Approaches in Agricultural Waste Management

Message from the Guest Editors

Agricultural activity is certainly responsible for sustaining the population's food supply. Parallel to the generation of the food and goods that society demands, agriculture produces a huge amount of biodegradable waste that poses an interesting present and future challenge. The use of effective methods for managing this organic waste is a powerful tool for promoting a truly sustainable future for agriculture.

This Special Issue will focus on “Innovative Approaches in Agricultural Waste Management”. Research papers, reviews, and opinion articles covering all related topics, including circular economy, management alternatives such as composting, anaerobic treatment and energy recovery, improvement of current management processes, and potential use of agricultural waste in biorefineries and policy positions are welcome.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
