

## Special Issue

# Allelochemicals: Effects on Seed Germination and Plant Growth

### Message from the Guest Editors

Allelopathy is concerned with the effects of chemical compounds produced by plants or microorganisms on the growth, development and distribution of other plants and microorganisms in natural communities or agricultural systems. Researchers have found allelopathic plants that are now used as cover crops, and allelochemicals which may lead to new herbicides. Plant-derived allelochemicals thus offer an environmentally friendly alternative to agrochemicals in sustainable agriculture, and the synthesis of novel agrochemicals based on allelochemicals has attracted a great deal of attention from scientists engaged in agronomic research. On the other hand, soil-borne fungal diseases pose serious constraints on agro-productivity. Biological control is a non-hazardous strategy to control plant pathogens and improve crop productivity, and in the soil there are microorganisms (fungi, plant-growth-promoting rhizobacteria, etc.) that can act as biological control agents. These microorganisms are able to produce allelochemicals that confer positive effects on plants.

### Guest Editors

Prof. Dr. Natividad Chaves Lobón

Department of Plant Biology, Ecology and Earth Sciences, Faculty of Science, University of Extremadura, 06006 Badajoz, Spain

Prof. Dr. Juan Carlos Alías Gallego

Universidad de Extremadura, Badajoz, Spain

Prof. Dr. Sara Rodrigo

Department of Agronomy and Forest Environment Engineering, University of Extremadura. Avenida Adolfo Suárez s/n, 06007 Badajoz, Spain

### Deadline for manuscript submissions

closed (15 October 2021)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

---

### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,  
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
