

Special Issue

Mitigation of Ammonia and Greenhouse Gas Emissions from Livestock Systems

Message from the Guest Editors

We invite all the research teams dealing with NH₃ and GHG emissions from livestock production to share your most recent results in this Special Issue with research articles. Invitations are open but not limited to the following topics:

- Emissions from livestock facilities and animal manure management: assessment of emissions factors, mitigation techniques, impacts on animal welfare and environment
- Enteric fermentation and animal welfare
- Ammonia and GHG measurement: new expedited and accurate methodologies and low cost solutions to assess gaseous emissions in emerging countries
- Implementation of available technology: farmer and society acceptance, optimization of costs

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
