

## Special Issue

# Biological Invasions in Agroecosystems: Insights for Sustainable Management

### Message from the Guest Editors

Biological invasions do not spare any area in the world and are constantly increasing through human activities. Alien invasive species can also have adverse effects on human health and considerable economic impacts. This is particularly true in invaded agro-ecosystems where costs can run into hundreds of billions of dollars per year. The sustainable management of invasive species in cultivated environments requires an integrated knowledge of their biology in a broad sense as well as of their natural enemies and their biological control. In this Special issue of *Agronomy*, we are looking for research papers and review articles on invasive alien plant, animal or microbe species invading agricultural ecosystems. All studies on the biology of these invasive species and on sustainable methods for their control are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
