

Special Issue

Black Carbon and Its Effects on Crop Productivity and Nutrient Cycling

Message from the Guest Editors

This Special Issue on “Black Carbon and Its Effects on Crop Productivity and Nutrient Cycling” aims to move agriculture toward a better and sustainable future. It is common knowledge that less and less land has to feed more and more people on our planet. It is therefore essential to pay more attention to soil fertility than ever before. The use of black carbon is one of the most promising solutions for this important matter. In your papers, we expect the transfer of experience with the use of black carbon in various conditions. We consider the transfer of experience to be the most important message of our Special Issue. We strongly believe that your publications will lead to improved soil properties worldwide and thus contribute to the development of modern agriculture and sustainability. Sustainable and at the same time efficient agriculture is, after all, the only way to feed eight billion people.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
