

Special Issue

Conventional and Molecular Breeding Technologies for the Improvement of Industrial Crops

Message from the Guest Editor

This Special Issue is focused on “Conventional and Molecular Breeding Technologies for the Improvement of Industrial Crops”. We invite novel research studies and reviews covering related topics to improve industrial and bioenergy crops, including genetic and genomics, breeding methodologies, gene discovery and identification, genetic and phenotypic diversities, high-throughput genotyping and phenotyping strategies, genomic selection and prediction, responses to biotic and abiotic stresses, and exploring genotype and environments interactions ($G \times E$).

Guest Editor

Dr. Hussein Abdel-Haleem

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
