

Special Issue

Citrus Production and Protection from Pests and Diseases

Message from the Guest Editors

This Special Issue is focused on the development, screening, and analysis of compounds towards sustainable citrus production that reduces the impact of pathogens and pests of citrus fruit trees. It will welcome research on sustainable citrus production using natural or synthetic bioactive compounds, gene targeting, and plant-breeding strategies to suppress microbes (virus, bacteria, fungi), arthropods (insects, mites), and nematodes, including laboratory or field studies on Integrated Pest Management, Biological Control, Integrated Molecular Plant Management, or other strategies for the control of pathogens and pests of citrus fruit crops.

Guest Editors

Dr. Wayne B. Hunter

Dr. Liliana M. Cano

Dr. Jawwad A. Qureshi

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
