

Special Issue

Effects of Climate Change on Grassland Biodiversity and Productivity

Message from the Guest Editors

This Special Issue calls for papers about how changes in weather variables and CO₂ concentrations affect the relationships between productivity and biodiversity. It also seeks papers to report advances on how changes in carbon stocks, nutrients and water (and their spatial heterogeneity) explain these relationships. Contributions are encouraged to illustrate the influence of legumes and other functional groups on soil carbon storage and to interpret them through the role played on productivity and biodiversity by grazing and fertilization gradients. Contributions can also focus on the role of new technologies (remote and proximal sensing, model-based forecasting, mobile applications, etc.) for grassland management, as well as on the influence of policy measures and different socio-economic contexts on the interactions between productivity and biodiversity under a changing climate.

Guest Editors

Dr. Gianni Bellocchi

Grassland Ecosystem Research Unit (UREP), French National Research Institute for Agriculture, Food and Environment (INRAE), 63000 Clermont-Ferrand, France

Dr. Catherine Picon-Cochard

French National Institute for Agricultural Research (INRAE), Université Clermont Auvergne (UCA), VetAgro Sup, UREP, 63000 Clermont-Ferrand, France

Deadline for manuscript submissions

closed (31 December 2020)

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
