

Special Issue

Ecophysiology and Management of Grapevines Under Changing Climatic Conditions

Message from the Guest Editor

Climate change poses ongoing challenges to vineyard sustainability and is drastically altering the global viticultural landscape vis-à-vis site suitability, selection of grapevine cultivars and rootstocks, and management practices. While viticulturists have a range of tools in their toolkit to adapt to and manage vineyards under changing environmental conditions, we have little understanding of the inherent ability of grapevines to respond and adapt to these changing conditions, particularly over long (i.e., decadal) timescales. This lack of understanding underestimates the potential plasticity that grapevines may possess to adapt to and even thrive under changing environments.

Due to the broad nature of this topic, papers will range from fundamental anatomical and biophysical changes to biochemical and physiological modifications relating to grapevine plasticity. Through this Special Issue, we hope to increase our nascent understanding of the phenotypic plasticity of specific traits that grapevines possess to increase resilience to a changing climate.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
