

Special Issue

Advances in Cotton Breeding and Production for Stress Resilience and Fitness

Message from the Guest Editors

Cotton production is increasingly affected by extreme weather changes, soil salinization pollution, and labor shortages. This calls for new germplasm resources, stronger breeding methods for yield, high-quality fiber, disease, insect, salinization, heavy metal, temperature resistance, as well as smarter cultivar systems.

This Special Issue covers original research and review articles on germplasm, heterosis utilization, yield stability of cotton under abiotic or biotic stresses, i.e., cold, high temperature, drought, salinity, and heavy metal or insect incidence. Submissions on (but not limited to) the following topics are invited: (1) cotton germplasm resources innovation under traditional and modern methods, (2) cotton breeding for abiotic/biotic stress tolerance, (3) molecular and physiological mechanisms and regulation networks of cotton in response to abiotic or biotic stresses, and (4) efficient management options for cotton production.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
