

Special Issue

Evolution of Compounds and Characteristics of Crops during Ripening and after Harvest

Message from the Guest Editors

Dear Colleagues, Consumers are increasingly asking for products with better organoleptic characteristics, flavors, aromas, colors, attractiveness, etc. Farmers must estimate with maximum precision the optimum time of harvest, so that their product reaches the consumer or industry in the best condition, providing a product with the highest quality. This Special Issue will focus on the evolution of the compounds present in crops and plants during maturation to determine the optimal time of harvest based on the characteristics required of the product. Works that deal with the evolution of crops and their characteristics after harvest are also accepted.

Guest Editors

Prof. Dr. Gerardo Fernández Barbero

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
