

## Special Issue

# Crop Disease Modeling and Disease Warning System

### Message from the Guest Editors

Plant diseases are a major threat to the profitability and sustainability of agricultural production when left uncontrolled. Agricultural stakeholders are increasingly under pressure to adapt their decision-making to make more informed and efficient use of fertilizers and pesticides. They also face increasing uncertainty in how best to respond to competing health, environment, and (sustainable) development impacts and risks. Disease dynamics involves a complex interaction between a host, a pathogen, and their environment, representing one of the largest risks facing the long-term sustainability of agriculture. Disease risk and prediction models, considered as standalone or integrated within disease-warning systems, can help unravel the complex interconnection between the various factors conducive to disease outbreaks, thereby supporting decision making for improved disease management.

### Guest Editors

Dr. Moussa El Jarroudi

SPHERES Research Unit, Department of Environmental Sciences and Management, University of Liège, Arlon, Belgium

Dr. Louis Kouadio

Centre for Applied Climate Sciences, Institute for Life Sciences and the Environment, University of Southern Queensland, Toowoomba, QLD 4350, Australia

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

---

### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,  
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
