

Special Issue

Circular Economy for a Sustainable Management of Resources in Agriculture

Message from the Guest Editors

Agriculture is a key sector of the global economy as a provider of food and bioresources to different economic sectors. The importance of the circular economy (CE) principles lies in the fact that they attempt to replace the linear production-consumption process based on "produce, use and dispose" with a circular process based on "reduce, reuse and recycle". In summary, this circularity is based on the principle of "closing the life cycle" of resources so that the necessary goods and services are produced, while reducing the consumption and waste of energy, water and raw materials, and therefore contributing to more sustainable production.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
