

Special Issue

Perspectives and Challenges for Sustainable Management of Fruit and Foliar Diseases

Message from the Guest Editor

We are currently facing difficult and changing times. On the one hand, it is increasingly urgent to improve crop protection strategies, in order to minimize the losses caused by diseases. On the other hand, many agricultural systems still depend on a great number of fungicide applications per season to control fruit and foliar diseases, which may result in an environmental threat. The Special Issue aims to solicit original contributions from academics and researchers to create a roadmap on future perspectives and challenges that should be faced in this context on various crops. The editors encourage contributions related to precision agriculture, monitoring tools, such as forecasting models and decision support systems, as well as innovative insights into biocontrol. Contributions aiming to assess or evaluate innovative management strategies, particularly focusing on a holistic approach, will also be considered. The scope of submission includes original research and review articles that address the issues raised above.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
